

**CY4GATE IS AWARDED A €200,000 CONTRACT IN THE DEFENCE INDUSTRY WITH A PRESTIGIOUS EUROPEAN AEROSPACE AND DEFENCE COMPANY**

Rome, 8 September 2021 - **CY4GATE** (AIM: CY4), a company active in all areas of the cyber intelligence and cyber security market, has been awarded a contract worth around €200,000 with a major European aerospace and defence company to implement important research and development in cyber intelligence and cyber security applied to Aerospace and Defence.

The aim of the project is to develop a proof of concept (PoC) that, based on CY4GATE's proprietary technologies, identifies and trials innovative architectures for cyber resilience and is centred around minimising the impacts of new forms of cyber attacks on military infrastructures and platforms, which are now more vulnerable to this type of networkcentric warfare given the increasingly greater interconnection between platforms and sensors.

The project will revolve around the use of sophisticated artificial intelligence, machine learning and cognitive computing techniques capable of preventing and countering new generation cyber attacks. The corporate market also stands to reap significant benefits from initiatives like this, as it will be able to make use of the cutting-edge technologies developed according to the higher and more rigorous requirements and standards typical of Aerospace & Defence.

***Emanuele Galtieri**, CEO and General Manager of CY4GATE, remarked, "Research and innovation are still in CY4GATE's DNA. We work in a sector where developments in technology and new cyber threats force us to constantly track changes and adapt, upgrading the products and services we offer and even adjusting our business model. We are proud to have been chosen for this ambitious development project, which will carry us forward into the future of cyber security and cyber intelligence, and we see it as a growth opportunity that furthers the strategy we have clearly defined."*

\*\*\*\*\*

CY4GATE was founded in 2014 to meet demand for unconventional cybersecurity solutions. Listed on the AIM since June 2020, CY4GATE was created to design, develop and produce technologies, products and services that respond to even the most rigorous and sophisticated "Cyber Intelligence & Cyber Security" needs expressed by the Armed forces, Police, Intelligence Agencies and Companies in Italy and abroad. With its one-of-a-kind Italian business model, CY4GATE covers the entire cyber market with proprietary products for both data collection and analysis and security: QUIPO and Igea for cyber intelligence; RTA for Cyber Security.
