

**Press Release**

**CY4GATE HAS AWARDED A RESEARCH AND DEVELOPMENT CONTRACT IN THE CYBER SECURITY SEGMENT FOR A LEADING NATIONAL COMPANY**

**THE 6-MONTH PROJECT IS WORTH € 700,000**

Rome, 20 November 2023 - **CY4GATE (CY4.MI)**, a national and European player in cyber security and cyber intelligence, has signed a contract for research and innovation in cyber security with a leading national high-tech company.

The supply is worth € 700,000 for the duration of 6 months and involves the deployment of a team of the company's highly qualified resources for an initial study and research phase on the protection of interconnected networks and sensors (IoT/OT).

This is the first phase of a larger, international, multi-year project for which the company has succeeded in gaining recognition as a qualified technology partner.

The acquisition of this new contract marks the start of a journey for Cy4Gate towards the cyber solutions of the future, with the aim of preventing rapidly evolving cyber threats.

The company continued to strengthen and evolve cyber security product portfolio with:

- its “cyber threat hunting” system, RTA, latest generation SIEM, for “real time warning” of anomalous behaviour and therefore potential attacks on networks, and with the possibility of activating increasing levels of automation in the response to the attack;
- “Cyber Digital Twin”, a technology that can reproduce a computer network of a company or public body in order to enable realistic training for cyber security operators, simulate attack scenarios to verify the robustness of networks and use it as a tool for preventive testing of new technologies before their integration on the real network;
- “SENTRY”, which detects early cyber attacks carried out with advanced techniques that make malware persistent in the targeted systems/devices;
- “Fusion”, a Cyber Threat Intelligence platform created to collect and analyse information on existing or emerging cyber threats, thus enabling threat identification/monitoring and blocking, but also to obtain valuable information on attackers and their motivations and intentions.

A few days ago, a preliminary agreement was concluded for the acquisition of a controlling stake in XTN, an Italian company that will bring its proprietary platform for fighting digital fraud on online services such as banking. This latest M&A growth initiative will make the company even more structured in offering solutions to protect against wide-ranging digital threats.

**Emanuele Galtieri**, CEO and General Manager of Cy4Gate Group said: *"This is an important project for us because it harbours technological innovation, which is the lifeblood for a company working in a sector where the obsolescence of solutions is advancing rapidly. It is only the first piece of a wider-ranging, multi-year project that*

## Press release

*will allow us to explore new frontiers in terms of protection, at a time when the evolving threat requires us to know how to play in advance. I am therefore satisfied that the company has been able to establish itself and be recognised as an industrial partner in a very ambitious initiative aimed at next-generation cyber”.*
