

CY4GATE SIGNS A PARTNERSHIP AGREEMENT WITH ENGINEERING

KEY POINTS OF THE AGREEMENT INCLUDE DEVELOPMENT OF NEW CYBERSECURITY AND DECISION-INTELLIGENCE PRODUCTS AND SERVICES.

Rome, 23 February 2021 - CY4GATE, (AIM: CY4) a comprehensive cyber market solution provider, announces that it has signed a partnership agreement with Engineering, one of the main players in the digital transformation of companies and public and private organisations in Italy and worldwide, for the development, distribution and marketing of new cybersecurity and cyberintelligence solutions, products and services based on Real Time Analytics and Threat Intelligence technologies.

Eugenio Santagata, CEO and General Manager of CY4GATE, commented: *“The agreement, which once again confirms CY4GATE’s growing role and expertise in the Italian cybersecurity and cyberintelligence community, is consistent with the Company’s strategic and development plan and is proof of its ability to add value by acting as a technological enabler to, and not competing with, major Italian industrial players, while also contributing to expanding our range of top-tier services and maximally effective proprietary solutions.”*

Emanuele Galtieri, Deputy General Manager of CY4GATE, commented: *“Engineering is an important Italian company and this partnership is clearly recognition of CY4GATE and its range of cybersecurity solutions offered according to the roadmap already laid down in our strategic plan.”*

Marco Tulliani, Engineering’s CSO, commented: *“The partnership with CY4GATE further reinforces Engineering’s value proposition in predictive analysis. We chose to work with CY4GATE because it, like us, is already operating on the international market in these segments and offers innovative products into which we can integrate our intelligence capabilities.”*

Roberto Mignemi, Cybertech’s CEO, commented: *“Investing in the quality of our services to ensure integrated, top-tier services for our clients has been Cybertech’s way for over ten years now. Our partnership with CY4GATE is another step in this direction, because it allows us to further accelerate the evolution and quality of our Incident Response Team service.”*

The partnership between CY4GATE and Engineering combines the potential of CY4GATE’s Real Time Analytics and Threat Intelligence systems with the Incident Response Team experience and expertise offered by Cybertech, the Engineering Group company specialised in cybersecurity services, and the SOC unit of the Engineering Group, particularly effective at Incident Response on a global scale, 24 hours a day, seven hours a week, with multilingual support. This full service integration enables full outsourced cybercrime protection based on advanced technology and for fixed costs.

In particular, the CY4GATE products that are the pillars of the agreement are:

- QUIPO, decision-intelligence software that seeks to optimise and support the decision-making process (in terms of speed, accuracy, personalisation, scalability and adaptability). QUIPO performs live collection, analysis and deployment of enormous volumes of heterogeneous data to provide decision-making and decision-augmentation support.
- Real Time Analytics (RTA) is the SIEM solution developed by CY4GATE to monitor IT security and respond to cyber-incidents. Thanks to AI and correlation algorithms, it can acquire, normalise, enrich, analyse and index enormous cyber-event flows in real time, allowing analysts to detect anomalies and enable a swift response.

About CY4GATE

CY4GATE was founded in 2014 to meet demand for unconventional cybersecurity solutions. Listed on the AIM since June 2020, CY4GATE was created to design, develop and produce technologies, products and services that respond to even the most rigorous and sophisticated “Cyber Intelligence & Cyber Security” needs expressed by the Armed forces, Police, Intelligence Agencies and Companies in Italy and abroad. With its one-of-a-kind Italian business model, CY4GATE covers the entire cyber market with proprietary products for both data collection and analysis and security: DSINT, HYDRA, EPEIUS, Gens.AI and Igea for cyber intelligence; RTA for Cyber Security.
