

**CY4GATE WILL SUPPLY A MAJOR CYBER ELECTRONIC WARFARE SOFTWARE SYSTEM TO A
TOP GOVERNMENT SECURITY ORGANISATION**

**THE PROJECT, WORTH AN ESTIMATED € 600,000, TOGETHER WITH CONTRACTS FINALISED IN THE
LAST MONTHS OF 2020 WILL HAVE A SIGNIFICANT IMPACT ON THE MAJOR ACCELERATION OF
REVENUE GROWTH AND CY4GATE'S FUTURE PROFITABILITY**

Rome, 29th December 2020 - **CY4GATE (AIM: CY4)** - a company active across all areas of the cyber market, announces that it will supply a major Cyber Electronic Warfare hardware and software system to a top government security organisation.

The contract, worth around € 600,000, will have a significant impact on the company's annual performance and its future growth. The system addressed by the contract enables the collection, correlation, and analysis of information sent and received through both the electromagnetic spectrum, or airwaves, and the digital domain. The main output is a tactical, comprehensive, and coherent "working picture" which enables decision makers on the ground to benefit from "information superiority" in complex situations, fundamental for taking action in time-limited, high-stress scenarios. The system is also secured against hacker attacks using a proprietary Cyber Security solution.

The agreement is the second part of the statement from the 23rd of December 2020 and attests to the variety and versatility of Cy4gate based technologies composed of machine learning algorithms, artificial intelligence, and cognitive computing, proprietary and developed in Italy by our young software engineers, mathematicians, and physicists.

The Cyber Intelligence solution for the corporate market, called Quipo, also stands to benefit directly from these algorithms, creating a virtuous spillover between government and civil sectors as evolved technologies have often brought about over the last few decades.

Eugenio Santagata, CEO of CY4GATE, stated: *"By supplying this, Cy4gate reinforces their position in the emerging Cyber Electronic Warfare sector when it comes to Law Enforcement, Intelligence, and Military operations. It confirms, in addition, that the Cy4gate business model based on proprietary software solutions is unique and unrivalled in Italy and in Europe"*

About CY4GATE

CY4GATE was founded in 2014 to meet demand for unconventional cybersecurity solutions. Listed on the AIM since June 2020, CY4GATE was created to design, develop and produce technologies, products and services that respond to even the most rigorous and sophisticated cyber intelligence & cybersecurity needs of the Armed forces, Police, Intelligence Agencies and Businesses in Italy and abroad. With its one-of-a-kind Italian business model, **CY4GATE** covers the entire cyber market with proprietary products for both data collection and analysis and security: DSINT, HYDRA, EPEIUS, Gens.AI and Igea for cyber intelligence; RTA for cybersecurity.
