

**CY4GATE WILL SUPPLY AN IMPORTANT CYBER INTELLIGENCE AND CYBER SECURITY SOFTWARE PLATFORM TO A TOP GOVERNMENT SECURITY ORGANISATION**

**THE PROJECT IS WORTH APPROXIMATELY € 1,000,000**

**THE BRILLIANT RESULTS IN THE COMPANY'S HALF-YEAR REPORT AND ITS ACQUISITION OF MAJOR CONTRACTS IN THE LAST FEW MONTHS OF THE YEAR CONFIRM EVEN MORE THE SOUNDNESS AND SUCCESS OF THE COMPANY'S UNIQUE BUSINESS MODEL AND STRATEGIC VISION.**

Rome, 23 December 2020 - CY4GATE, (AIM: CY4) - a company active in all the areas of the cyber market, announces that it will supply an important cyber intelligence and cyber security software platform to a top government security organisation.

The technology is part of the cyber intelligence and cyber security product family and harnesses sophisticated *artificial intelligence, machine learning* and *cognitive computing* techniques at the cutting edge in Italy and Europe.

The contract, worth around € 1,000,000, will have a significant impact on the company's future growth.

In the wake of the brilliant results for the first half of 2020, these last three months of the year and the major new contracts acquired have demonstrated that, despite the public health emergency and the consequent economic slump, the Company's business model is as solid and clear as its vision.

Cy4gate's business model is one-of-a-kind and unparalleled among Italian and European competitors. Cy4gate is not a cyber security services company, but a comprehensive cyber product hub currently offering six vertical SW and HW solutions that are highly specialized, fully proprietary and developed completely in-house. Positioned on three markets undergoing rapid global growth (Intelligence Platforms, Cybersecurity and Lawful Interception), they are designed for both the government and corporate markets in Italy and abroad and are the result of all-Italian expertise.

Eugenio Santagata, CEO of CY4GATE, stated: *“Cy4gate is the example that Italy and Europe were waiting for. Now they are places to do business and develop cutting-edge SW technology financed by private capital, without merely imitating other models, like Silicon Valley, but instead mapping out their own strategy for success based on quintessential Italian know-how and the growing awareness that cyber security cannot be entrusted to third parties unconditionally, but it is a course that institutions, companies and private citizens must chart together in order to develop an Italian and European model in which our data and our information are safe.”*
