

**CY4GATE AWARDED NEW CONTRACTS IN THE LAST FORTNIGHT WITH LEADING
CORPORATE AND GOVERNMENT CLIENTS IN THE CYBER SECURITY SECTOR**

THE CONTRACTS TOTAL AROUND 1,300,000 EURO OVER THE 1-YEAR DURATION

Rome, 14th February 2023: CY4GATE (EGM: CY4) – a group operating in the all-round cyber security and cyber intelligence market – was awarded contracts for the supply of its modern SIEM RTA along with its verticalisation and integration to protect both government and corporate entities.

The total value of the contracts acquired tallies approximately 1.3 million euro over a period of 1 year. 65% of the total contracted amount comes from agreements with government clients, whilst the remainder is from acquisitions by corporate clients.

The contract foresees the provision of licences for Cy4gate's modern SIEM RTA, both to be integrated on client Security Operations Centres and to be customised in a specific context also in stand-alone mode for detecting anomalous behaviour on the networks concerned, viewed on a dedicated dashboard for the benefit of specialised personnel so as to prevent and/or suppress any potential attack and especially to ensure business continuity for the company or institution that installs this technology.

Some of the acquired contracts, in which a project built around the specific needs to have emerged during the requisitioning process with the client, will bring new skills and expertise to the Cy4Gate engineering team, which shall have to implement specific verticalisation processes with the transversal support of the company, including the Cy4Gate Artificial Intelligence Competence Centre, set to be called upon to contribute to identifying and developing the appropriate Artificial Intelligence algorithms for operating on new and complex operational scenarios in the cyber domain.

Emanuele Galtieri, CEO and General Manager of CY4GATE, states, *"I am pleased with the acceptance levels enjoyed by our modern SIEM RTA, which is increasingly being chosen from amongst the various options available on the market, to play the delicate role of helping to strengthen our clients' cyber-barriers. These new contracts are a significant boost towards continuous improvement of the functional characteristics of the product in order to constantly adapt to changing and complex situations, which are often unmanageable with the simple purchase of standard and inflexible technologies, in the knowledge that every entity has its own particularities, meaning that this type of system cannot always respond to the logic of 'fit for all'. At a time when the level of insecurity – both real and perceived – in the cyber domain is high, we are confident that the tailor-made approach that the company has always adopted translates into the affinity and proximity that shall help clients approach sensitive cyber issues with greater serenity, facilitating the awareness and consciousness necessary for a decisive change of pace in the overall governance of cyber security."*

About CY4GATE GROUP

The Company was founded in 2014 to meet an unconventional demand for cyber security. Listed on the Euronext Growth Milan since June 2020, the CY4GATE Group was conceived to design, develop and produce technologies and products, systems and services that are able to meet the most stringent and modern Cyber Intelligence & Cybersecurity requirements, as expressed by Law Enforcement Agencies, Armed Forces, Institutions and Companies, both at home and abroad. A unique Italian industrial project, CY4GATE operates in all facets of the cyber market, with proprietary products that meet the needs for information collection and analysis as well as security.
