

Press release

**CY4GATE GROUP RECOGNIZED IN 2025 AS A “REPRESENTATIVE VENDOR” IN TWO GARTNER REPORTS ON COMPOSITE ARTIFICIAL INTELLIGENCE**

Roma, April 28, 2025 – **CY4GATE (CY4.MI)**, a national and European leader in the cyber security and cyber intelligence sector, announces that it has been recognized as a Representative Vendor in two recent Gartner reports — **Emerging Tech Horizon** and **Emerging Tech Impact Radar** — within the category of Composite AI®. This recognition highlights Cy4Gate capabilities in developing Composite Artificial Intelligence models, an advanced approach that combines multiple AI techniques to effectively address complex problems by leveraging the strengths of each method to create more robust solutions.

These Gartner reports explore how disruptive technologies — with Artificial Intelligence at the forefront — will shape the market over the next three years, emphasizing their potential impact on business operations, security, and the services and processes they enable. The reports not only analyze emerging trends and technologies but also spotlight key players who are actively investing in and developing solutions aligned with these technological frontiers — Cy4Gate Group among them.

These mentions bring the total number of recognitions awarded to Cy4Gate by Gartner to six in the past four years. They also complement the numerous accolades received by XTN, a Cy4Gate Group company specializing in online fraud prevention. Together, these honors underscore the Group’s commitment to creating disruptive, proprietary innovation that delivers real value to clients.

Thanks to recent strategic acquisitions of recognized technology vendors in the Italian and European markets (RCS, Diateam, XTN), Cy4Gate has further strengthened its position as a cutting-edge technology hub in cyber security, decision intelligence, and forensic intelligence. AI and Machine Learning models are at the core of Cy4Gate’s technology stack, providing a key competitive advantage in the development of advanced cyber protection and threat detection solutions.

These AI-driven capabilities also play a vital role in the Group’s decision intelligence offerings — especially in areas such as big data analysis, correlation of structured and unstructured data, and advanced visualization and representation.

Emanuele Galtieri, CEO and General Manager of CY4GATE Group, commented: *“We are proud of Gartner’s recognitions, which reflect our unwavering commitment to innovation. We strive not only to follow trends but to lead them — offering our clients solutions capable of navigating the complexity and volatility of today’s digital landscape. In the cyber domain, being a follower is not an option. One must anticipate change, not react to it. These Gartner mentions confirm our approach of acting as a first mover”.*
