CY4GATE AND RECO 3.26 SIGN AN AGREEMENT FOR AN APPLIED ARTIFICIAL INTELLIGENCE SOLUTION IN THE FIELD OF VIDEO ANALYSIS AND COMPUTER VISION

CY4GATE CONTINUES IN THE PROCESS OF CONSOLIDATING ITS OFFER IN THE CYBER SECTOR

Roma, 12th July 2023 - **CY4GATE (CY4.MI)** – a group operating in the all-encompassing cyber security and cyber intelligence market, and **RECO 3.26,** an Italian company specializing in Image Recognition and Video Analysis that offers innovative and customized Vision Intelligence solutions for public and private entities, announce that they have signed a strategic agreement for an artificial intelligence solution applied in the field of video analysis and computer vision.

With this agreement, Cy4Gate has acquired, on an exclusive basis, the right to use, in the context of activities limited to Forensic Intelligence, the "Reco Finder" technology currently in use also by the national Law Enforcement Agencies.

Reco 3.26 will supply Advanced Image Recognition technologies that the Cy4Gate Group will integrate as an added value to its value proposition to further improve the technical capabilities of its solutions in the field of Augmented Decision Intelligence and video/image analysis.

Vision Analysis & Intelligence, enabled by Augmented Decision Intelligence solutions resulting from the application of Artificial Intelligence algorithms, represents the ability to extract key information for the analysis context by processing both images and videos. The primary objective is to strengthen the security, surveillance and investigation systems. This is possible thanks, for example, to innovative facial recognition technologies that allow you to verify the authorization to access specific areas subject to security restrictions.

The partnership between these two Italian companies will lead to the development of solutions that will find natural use in contexts where there is a need to improve the performance of data management and analysis systems for security purposes through Vision Intelligence techniques enabled by artificial intelligence. Immediate application will benefit the national Law Enforcement Agencies for which the innovative solution was designed and which will be able to ensure greater efficiency and effectiveness in carrying out the institutional service for which they are responsible.

The agreement will therefore give life to a collaboration in the field of Image Recognition and Video Analysis with a strong impact on the national domestic market to integrate and consolidate a range of offers aimed at the cyber sector at 360°.

***

Simone Pratesi, CEO of Reco 3.26 said: *"The sector in which we operate is in constant motion, partnerships will allow us to drive innovation to shape a new phase of maturity. After having supplied the SARI system to the Ministry of the Interior - State Police - today with Cy4Gate the new challenge will be AI applied to Forensic Intelligence activities with all-Italian technology".*

Emanuele Galtieri, CEO and General Manager of Cy4Gate Group commented: "*Helping to consolidate a virtuous ecosystem of Italian excellence such as Reco 3.26 in the field of Artificial Intelligence is part of the mission of Cy4Gate Group, aimed at creating turnkey solutions that are able to constitute a technological "gap filler" at the service of the institutions and of the companies in the niche segment in which our company operates*".
